Confidential. Prepared for the addressee only and not to be relied on by any other party.

1. Executive summary

Westgate Valuation Advisory has been instructed by Quillwood Credit Partners to assess the market value of the proposed Riverbank Quarter development at 18-26 Charles Street, Parramatta NSW 2150 for first mortgage security purposes. The site is a consolidated 4,120 square metre riverfront holding with development consent (DA/482/2024) for a 24-storey mixed use building comprising 212 build-to-rent apartments above 1,850 square metres of ground-floor retail.

We assess the market value of the site in its current state at A$21.5M and the market value as if complete and stabilised, held in one line as a build-to-rent asset, at A$318.1M. On a strata basis, the gross realisation of the residential and retail lots is assessed at A$336.2M (excluding GST).

Property	Riverbank Quarter, 18-26 Charles Street, Parramatta NSW 2150
Instructing party	Quillwood Credit Partners Pty Ltd (as lender)
Date of valuation	18 September 2026
Interest valued	Freehold, unencumbered
Planning	MU1 Mixed Use; development consent DA/482/2024 granted 22 August 2025
Market value as is	A$21.5M
Market value as if complete (in one line)	A$318.1M
Gross realisation (strata, ex GST)	A$336.2M
Capitalisation rate adopted	4.10%
Stabilised net operating income	A$13.04M

This report is subject to the assumptions, qualifications and limitations set out in Section 9 and must be read in its entirety.

2. Scope of instructions

We have been asked to provide our opinion of the market value of the subject property on the following bases: (a) as is, in its current state with the benefit of the existing development consent; (b) as if complete and stabilised, assuming the improvements are completed in accordance with the approved plans and specifications and leased at market rents; and (c) the gross realisation of the completed lots on an individual strata basis.

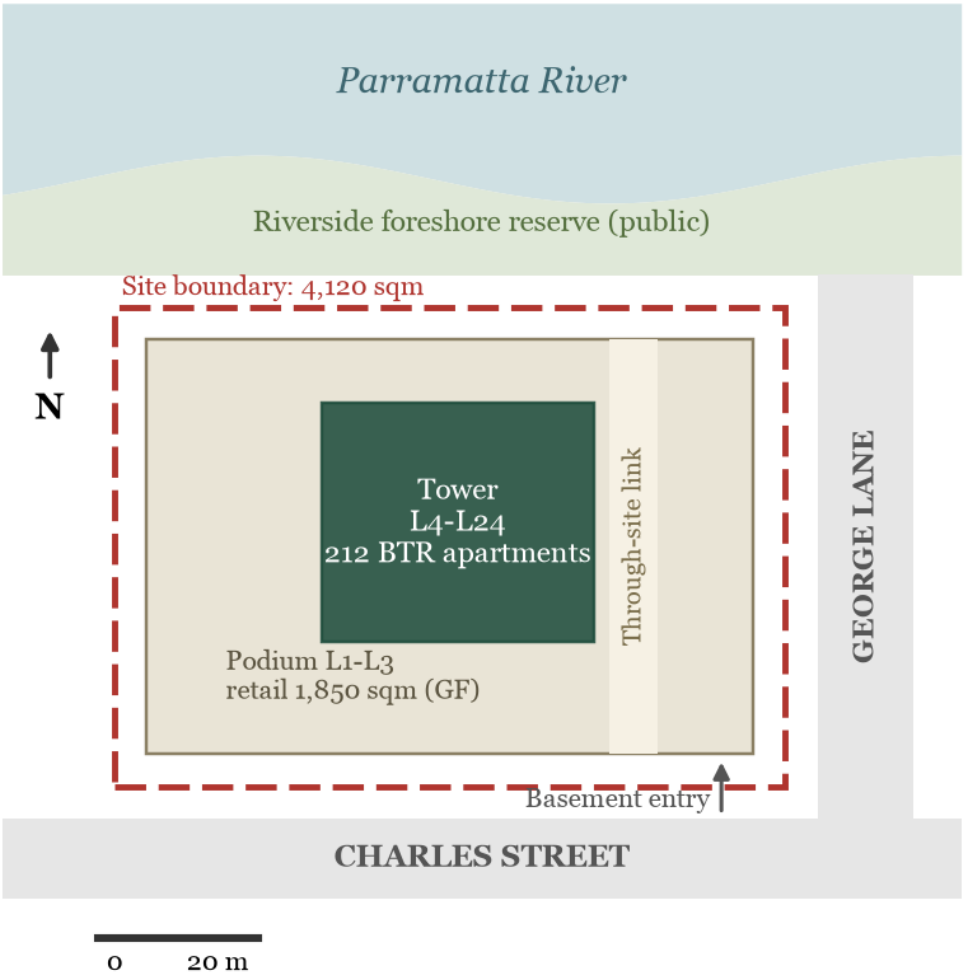

We inspected the property on 11 September 2026. We have relied on the architectural drawings prepared by the project architect, the fixed-price design and construct contract with Ironbark Constructions Pty Ltd and the cost plan reviewed by Barrow Quantity Surveyors. We have not undertaken a structural survey or environmental audit.

3. Site description

The site has a frontage of approximately 84 metres to Charles Street and a secondary frontage of approximately 60 metres to George Lane. The northern boundary adjoins the public riverside foreshore reserve, giving the upper levels of the proposed tower uninterrupted outlooks over the Parramatta River. The land is generally level and is currently improved with a vacant two-level commercial building and at-grade parking, which will be demolished.

The site is located approximately 650 metres east of Parramatta railway station and 400 metres from the Parramatta Light Rail stop on Macquarie Street. Westfield Parramatta, the Parramatta Square commercial precinct and Western Sydney University's Parramatta City campus are all within a 10-minute walk.

Figure 1. Site plan (schematic, not to scale for survey purposes)

The tower is set back from the foreshore reserve, with basement access from Charles Street.

4. Proposed development

The approved scheme provides a gross floor area of 27,400 square metres over a three-level podium and a 21-level residential tower, with 3 basement levels providing 238 car spaces. The residential component is designed for long-term rental, with resident amenities on Level 4 including a gym, co-working lounge and landscaped terrace.

Apartment type	Units	Average internal area (sqm)	Adopted weekly rent	Adopted strata value
1 bed	30	56	$880	A$920,000
2 bed	120	82	$1,240	A$1,380,000
3 bed	62	112	$1,760	A$2,060,000
Total / weighted	**212**

5. Market commentary

The Parramatta rental market remains one of the tightest in Greater Sydney. Residential vacancy was 1.2% in the June 2026 quarter, and new build-to-rent buildings in the precinct have leased up within six to nine months of completion. Rental growth has moderated from the double-digit rates recorded in 2023 but remains positive at approximately 4.4% per annum.

Investor demand for stabilised build-to-rent assets has deepened over the past 18 months, with domestic superannuation funds and offshore capital both active. Transaction yields for prime metropolitan assets have settled in a range of 4.05% to 4.40%.

6. Sales evidence

We have analysed the following transactions of stabilised build-to-rent assets in one line. The evidence supports a capitalisation rate between 4.05% and 4.25% for a new, well-located riverfront asset of this scale.

Property	Date	Units	Price	Cap rate	Rate per unit
Parkline BTR, 9 Hassall St, Parramatta	2025-11	246	A$268.4M	4.15%	A$1,091,057
The Wharf Residences, Rhodes	2025-06	302	A$318.0M	4.25%	A$1,052,980
Harbourline North, Olympic Park	2026-02	188	A$196.5M	4.20%	A$1,045,213
Riverside Commons, Parramatta	2026-05	214	A$243.0M	4.05%	A$1,135,514
Elan West, Westmead	2025-09	160	A$158.4M	4.40%	A$990,000

Table 2. Build-to-rent sales evidence

Development site sales in the Parramatta CBD fringe show rates of A$790 to A$815 per square metre of approved gross floor area. Applying A$785 per square metre to the subject's 27,400 square metres indicates an as-is value of approximately A$21.5M, which compares with the purchase price of A$19.8M in March 2024 before development consent was granted.

Property	Date	Site area (sqm)	Price	Rate per sqm GFA
2-8 Macquarie St, Parramatta	2025-04	3,640	A$18.20M	$790
41 Hassall St, Parramatta	2025-10	2,980	A$15.65M	$815
10-14 Phillip St, Parramatta	2026-03	4,450	A$23.90M	$802

Table 3. Development site sales evidence

7. Valuation as if complete

We have adopted the income capitalisation approach as our primary method, cross-checked by direct comparison on a rate per apartment basis. Our assessment of stabilised net operating income is summarised below.

Income capitalisation	A$
Gross residential rent (212 apartments)	A$14,784,640
Less vacancy and incentives (3.0%)	(A$443,539)
Less operating expenses (22.0% of gross rent)	(A$3,252,621)
Net residential income	A$11,088,480
Retail net income (1,850 sqm at $820/sqm, 4% vacancy)	A$1,456,320
Car parking and ancillary income	A$496,000
Stabilised net operating income	A$13,040,800
Capitalised at 4.10%	A$318,068,293
Adopted market value as if complete (rounded)	**A$318,100,000**

Table 4. Income capitalisation

The adopted value reflects a rate of approximately A$1,500,472 per apartment. This is above the A$0.99M to A$1.14M per apartment range of the sales evidence, which we attribute to the subject's larger average apartment size (87 square metres against approximately 68 square metres for the comparable buildings), its higher proportion of three-bedroom apartments and the income from the retail podium. On a rate per square metre of net lettable area the subject sits within the range of the evidence.

8. Valuation conclusion

Having regard to the evidence and analysis above, we are of the opinion that the market value of Riverbank Quarter as if complete and stabilised, held in one line, is A$318.1M (excluding GST) as at 18 September 2026. The market value as is, in its current state with the benefit of development consent, is A$21.5M.

The project's total development cost of A$263.7M, as reviewed by Barrow Quantity Surveyors, implies a development margin of 20.6% on cost against our as if complete value. We consider this margin adequate for a project of this scale and risk profile.

Key valuation risks

- A softening of build-to-rent capitalisation rates by 25 basis points would reduce the as if complete value by approximately 5.8%.
- Supply of new rental apartments in Parramatta is forecast to increase in 2028, which may extend the lease-up period.
- The value assumes completion in accordance with the approved plans and the fixed-price contract, with no material variations.

9. Assumptions and qualifications

This valuation is for first mortgage security purposes only and may be relied upon by Quillwood Credit Partners Pty Ltd as lender. The as if complete value assumes the development is completed to a high standard, consistent with the plans and specifications provided, and that the residential apartments are leased at the adopted rents with a stabilised occupancy of 97%. We recommend the valuation be reviewed at practical completion, or earlier if market conditions change materially.
