FastFreight Logistics Information Memorandum

A$38.0M Senior Secured Term Loan Facility

Prepared for prospective senior lenders

Prepared by Pemberton Debt Advisory

Version 1.0, 3 August 2026

Confidential

Reference: PDA/IM/FFL/2026-08-03

Date: 3 August 2026

Synthetic - for demonstration. All names, entities and figures are fictional.

Confidential. Prepared for the addressee only and not to be relied on by any other party.

Important notice

This Information Memorandum has been prepared by Pemberton Debt Advisory in conjunction with Lindqvist & Pryor Corporate Advisory Pty Ltd, the debt arranger, on behalf of FastFreight Logistics Pty Ltd (the Borrower). It is provided to selected prospective lenders solely to assist them to decide whether to submit a non-binding indication for the facility described in it. It is confidential and must not be copied or distributed without written consent.

The information has been supplied by the Borrower and its management and has not been independently verified except where stated. FY26 financial information is preliminary and unaudited at the date of this document. The independent valuation, the quantity surveyor review, the audited FY26 financial statements and the latest management accounts are in progress and are expected on the dates set out in section 9. Projections and opinions are management estimates. Recipients must make their own enquiries and form their own credit assessment. Pricing and terms are indicative and subject to credit approval by each lender.

1. Transaction summary

Borrower	FastFreight Logistics Pty Ltd
ABN	13 585 425 143
Registered office	Unit 6, 14 Distribution Drive, Eagle Farm QLD 4009
Sponsor	Rourke Family Holdings Pty Ltd (82%)
Sector	Transport and Logistics, last-mile parcel delivery
Facility	A$38.0M senior secured term loan, 60 months
Prepared by	Pemberton Debt Advisory
Document date	3 August 2026

Key details

1.1 The opportunity

FastFreight Logistics Pty Ltd (FastFreight) is a Queensland-headquartered last-mile parcel delivery operator. It services e-commerce retailers, wholesalers and third-party logistics providers across south-east Queensland, Sydney and Melbourne from nine depots. The business delivered approximately 14.6 million parcels in FY26 and generated preliminary revenue of A$82.8M and EBITDA of A$9.1M, an EBITDA margin of 11.0%.

The Borrower seeks a A$38.0M senior secured term loan with a five year tenor. Proceeds will refinance existing bank debt of A$29.5M, fund A$6.0M of depot sortation automation and fleet electrification capex, and meet A$2.5M of transaction costs and working capital.

1.2 Headline credit metrics

On a pro forma basis, assuming the facility is fully drawn, gross debt is A$38.0M, cash is A$2.5M and net debt is A$35.5M. Net debt to FY26 EBITDA is 3.9x and EBITDA interest cover is 2.3x. Against a preliminary independent enterprise value of A$62.0M, the loan to value ratio is 61.3%.

Metric	Value
FY26 revenue (preliminary)	A$82.8M
FY26 EBITDA (preliminary)	A$9.1M
EBITDA margin	11.0%
Pro forma gross debt	A$38.0M
Pro forma net debt	A$35.5M
Net debt / EBITDA	3.9x
EBITDA / interest	2.3x
Enterprise value (independent, preliminary)	A$62.0M
Facility / enterprise value	61.3%

Summary credit metrics, pro forma for the facility

2. Facility request

2.1 Proposed terms

Term	Indicative position
Type	Senior secured term loan
Limit	A$38.0M
Tenor	60 months from financial close
Repayment	Bullet, with 1.0% p.a. mandatory amortisation
Margin	3-month BBSW plus 6.25% p.a.
Establishment fee	2.00% (A$0.76M)
Line fee	1.00% p.a. on undrawn commitments
Status	Subject to credit approval

Indicative facility terms

Mandatory amortisation of 1.0% p.a. of the original principal equates to A$0.38M a year. After five years of amortisation the bullet balance due at maturity would be A$36.1M. The line fee applies to any commitments that remain undrawn during the availability period, including any capex tranche that lenders agree to make available on a delayed basis.

For the purpose of the interest cover calculation, the Borrower has assumed a 3-month BBSW of approximately 4.15% p.a., giving an all-in rate of about 10.4% p.a. and annual cash interest of approximately A$3.95M. A 100 basis point rise in BBSW would add approximately A$0.38M of annual interest and reduce interest cover to about 2.1x.

2.2 Sources and uses

Item	A$M	% of total
Senior secured term loan (source)	38.0	100.0%
Total sources	38.0	100.0%
Refinance existing bank debt	29.5	77.6%
Sortation automation and fleet electrification capex	6.0	15.8%
Transaction costs and working capital	2.5	6.6%
Total uses	**38.0**	**100.0%**

Sources and uses of funds

3. Business overview

3.1 Operations

FastFreight collects parcels from client fulfilment centres and consolidates them at depots before delivering to recipients. The group operates nine depots, with its main hub at Eagle Farm in Brisbane. It employs approximately 285 full-time equivalent staff and engages approximately 640 owner-driver contractors. Delivery capacity is provided through a mix of employed drivers and these contractors, which allows the group to flex capacity with volume.

Revenue is earned predominantly under rolling service agreements with per-parcel pricing. These agreements contain fuel and volume adjustment mechanisms. FY26 revenue of A$82.8M across 14.6 million parcels equates to average revenue of about A$5.67 per parcel.

3.2 History

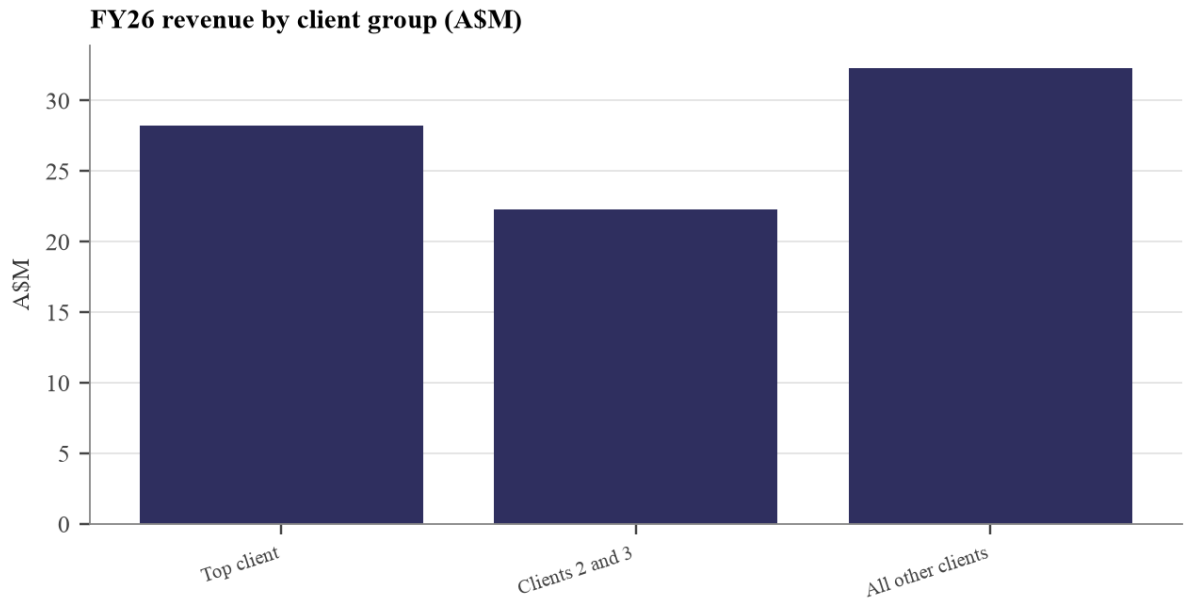

Date	Milestone
March 2011	Daniel Rourke founds the business with six vans servicing Brisbane metropolitan routes.
September 2016	Gold Coast and Sunshine Coast depots open, extending coverage across south-east Queensland.
May 2020	Multi-year contract won with a national online retailer, which becomes the largest client.
November 2023	Sydney and Melbourne entered through two leased depots and a small bolt-on acquisition.
October 2025	First automated sortation line commissioned at Eagle Farm, lifting hub throughput capacity by about 40%.

Key milestones

The business has grown organically since 2011 and remains founder-owned. The 2023 interstate entry was the only acquisition-led step and was small in scale.

3.3 Customers

The largest client, a national online retailer, contributed 34% of FY26 revenue, or approximately A$28.2M. The top three clients together contributed 61%, or approximately A$50.5M. The largest contract is due for renewal in 2028 and can be terminated for convenience on six months notice. Lenders should treat this concentration as the principal credit consideration.

Customer concentration. Top client 34%, next two clients 27%, balance 39% of A$82.8M preliminary revenue.

3.4 Capital expenditure programme

The A$6.0M growth capex programme comprises further depot sortation automation and fleet electrification. It builds on the Eagle Farm sortation line commissioned in October 2025. Tolland Quantity Surveyors Pty Ltd has been engaged to review the depot fit-out and automation budget, with its report expected on 26 August 2026. Management's case is that automation will lift throughput per depot hour and lower unit handling cost, and that electrification will reduce fuel exposure on employed-driver routes. These benefits are not yet demonstrated beyond the first Eagle Farm line and lenders should not assume them in base case cash flows.

4. Ownership and management

Rourke Family Holdings Pty Ltd, the vehicle of founder Daniel Rourke, holds 82% of issued capital. The balance is held by management. The board comprises three directors.

Director	Role
Daniel Rourke	Founder and Managing Director
Priya Holloway	Chief Financial Officer and Executive Director
Graham Ellison	Independent Non-Executive Chair

Board of directors

Mr Rourke remains central to client relationships and strategy. Formal succession planning is limited. The Borrower has indicated it will formalise succession and key person arrangements as a condition of the facility (see section 7).

5. Financial overview

5.1 FY26 performance

Preliminary, unaudited FY26 results show revenue of A$82.8M and EBITDA of A$9.1M, an EBITDA margin of 11.0%. Merriweather Kent Chartered Accountants is completing the FY26 audit and the audited financial statements are expected on 12 September 2026. Lenders will be advised promptly of any difference between the preliminary and audited figures. Historical comparatives, forecasts and a full cash flow model will be provided in the data room.

5.2 Pro forma capital structure

Item	A$M	x EBITDA
Senior secured term loan	38.0	4.2x
Less: cash	(2.5)	(0.3x)
Net debt	**35.5**	**3.9x**

Pro forma capital structure on FY26 EBITDA of A$9.1M

5.3 Sensitivity

The table below shows pro forma net leverage and interest cover if FY26 EBITDA were lower, holding net debt at A$35.5M and annual interest at A$3.95M. The analysis is arithmetic only and does not model working capital or capex responses.

EBITDA change	EBITDA (A$M)	Net leverage	Interest cover
Base case	9.1	3.9x	2.3x
Down 10%	8.2	4.3x	2.1x
Down 20%	7.3	4.9x	1.8x
Down 30%	6.4	5.6x	1.6x

EBITDA sensitivity, pro forma

A 10% decline in EBITDA would take net leverage above 4.0x. This is a thin buffer for a business with a 34% single-client exposure, and the proposed covenant package in section 7 has been framed with that in mind.

6. Valuation and security

6.1 Independent valuation

Harcourt Beale Advisory Pty Ltd, an independent business and asset valuer, has provided a preliminary enterprise value of A$62.0M, equivalent to about 6.8x FY26 EBITDA. Its final report is expected on 21 August 2026. The facility represents 61.3% of this value. Because the business is an asset-light service operator with leased depots, enterprise value depends on continued contract revenue and not on realisable hard assets. Lenders should weigh recovery accordingly.

Measure	Value
Enterprise value (preliminary)	A$62.0M
Implied EV / FY26 EBITDA	6.8x
Facility / enterprise value	61.3%
Valuation headroom to facility	A$24.0M
Value decline to reach 100% LVR	38.7%

Valuation coverage

6.2 Proposed security package

- First ranking general security agreement over all present and after acquired property of the Borrower and each material subsidiary.
- Guarantees and indemnities from the Borrower's material subsidiaries, with a guarantor coverage test.
- Share mortgage over the issued capital of the Borrower granted by Rourke Family Holdings Pty Ltd.
- Fixed charge over plant, equipment and owned fleet, including assets acquired with facility proceeds.
- Assignment of key contract rights, to the extent permitted by the underlying agreements, and of material insurances with lender interests noted.
- Discharge and release of all existing bank security at financial close.

Final security will depend on legal due diligence, including any consent requirements in client contracts and depot leases.

7. Proposed covenants and undertakings

The following terms are indicative and are expected to be refined in the term sheet.

Covenant	Level	Test
Net leverage (maximum)	4.50x to Jun 2027	Quarterly
Net leverage (maximum)	4.25x to Jun 2028	Quarterly
Net leverage (maximum)	4.00x thereafter	Quarterly
Interest cover (minimum)	1.75x	Quarterly
Capex (maximum, ex programme)	A$2.0M p.a.	Annual

Indicative financial covenants, tested on a rolling 12 month basis from 31 December 2026

At the opening level of 4.50x, EBITDA could fall by about 13% from A$9.1M before net leverage is breached, holding net debt constant. Interest cover of 1.75x would allow EBITDA to fall by about 24%. Leverage is therefore expected to be the binding covenant.

- Review event: notice of termination, non-renewal or material volume reduction from any client exceeding 15% of revenue, triggering lender consultation and a cash sweep of excess cash.
- Distributions to Rourke Family Holdings Pty Ltd restricted unless net leverage is below 3.5x and no default is continuing.
- Information undertakings: quarterly management accounts, audited annual accounts and an annual budget, with a quarterly customer concentration report.
- Key person and succession: a board approved succession plan and key person insurance on Mr Rourke within 120 days of close.
- Employment compliance: annual confirmation of contractor classification review and independent legal advice on the owner-driver model.
- Hedging: interest rate hedging of at least 50% of the drawn balance for the first three years.

8. Key risks and mitigants

Risk	Mitigant
Customer concentration: top client 34%, top three 61%; largest contract renewable 2028 and terminable on 6 months notice	Relationship since 2020; review event and cash sweep; concentration reporting; diversification under Sydney and Melbourne growth
Contractor model: reclassification, employment law reform, wage claims	Legal opinion on contractor arrangements; covenant headroom; indemnity and claims reporting; mix of employed drivers retained
Competitive pricing: national carriers and in-house retailer fleets; fuel pass-through lag	Fuel and volume adjustment clauses in service agreements; unit economics reporting; automation to lower handling cost
Leverage and cash flow: net leverage 3.9x, interest cover 2.3x	Amortisation; distribution lock-up; hedging; step-down covenants set with sensitivity analysis
Execution: interstate density and automation savings may be delayed	QS review of capex; staged drawing of capex funds against milestones; monthly programme reporting
Key person: founder central to clients and strategy	Succession plan and key person insurance as conditions; board strengthened by independent Chair

Risk summary

8.1 Commentary

Customer concentration is the most significant risk. Loss of the top client would remove about A$28.2M of revenue. The associated EBITDA impact cannot be derived from the available information because contribution margins by client have not yet been provided. Lenders should request this analysis in due diligence. A sustained loss of that scale would very likely breach financial covenants without cost action.

The contractor model is a structural risk shared across the last-mile sector. About 640 owner-driver contractors support the network, against 285 FTE employees. Any legislative or judicial change that required reclassification would raise labour costs and may not be fully recoverable under per-parcel pricing.

Leverage leaves limited room for error. The sensitivity in section 5.3 shows that a 20% EBITDA decline would take net leverage to about 4.9x, above every proposed covenant level. The proposed structure relies on early warning through the review event, rather than on balance sheet strength.

9. Due diligence and timetable

The process is intended to move from information memorandum to term sheet over approximately twelve weeks. Reports from the valuer, quantity surveyor and auditor will be released to participating lenders as they are finalised.

Date	Milestone
3 August 2026	Information Memorandum released
21 August 2026	Independent valuation report (Harcourt Beale Advisory Pty Ltd) expected
26 August 2026	Capex review report (Tolland Quantity Surveyors Pty Ltd) expected
12 September 2026	Audited FY26 financial statements (Merriweather Kent) expected
9 October 2026	Latest management accounts available
23 October 2026	Term sheet issued

Indicative timetable

Due diligence materials to be made available in the data room include the service agreements for the top three clients, contractor agreements, depot leases, insurance schedules, the fleet register, the financial model and the legal and tax reports.

10. Process and contacts

Lenders wishing to participate should sign the confidentiality undertaking and then submit a non-binding indication covering amount, pricing, tenor, covenants and conditions, together with credit approval requirements and expected timing. Indications should be addressed to Pemberton Debt Advisory, with a copy to Lindqvist & Pryor Corporate Advisory Pty Ltd. Lenders must not contact the Borrower, its clients, contractors, landlords or employees directly. All questions should be directed through the advisers.

This document does not constitute an offer or commitment to lend or an invitation to subscribe for securities. Participation by any lender is subject to documentation satisfactory to all parties and to final credit approval.
