Entity	FastFreight Logistics Pty Ltd
ABN	13 585 425 143
Registered office	Unit 6, 14 Distribution Drive, Eagle Farm QLD 4009
Reporting period	September 2026 and year to date (three months to 30 September 2026)
Financial year	FY27 (1 July 2026 to 30 June 2027)
Prepared by	Finance team, under Priya Holloway, Chief Financial Officer
Status	Unaudited management accounts

Document details

1. Executive summary

The group delivered a solid start to FY27. Year-to-date revenue was A$23.1M, A$0.3M (1.3%) ahead of budget, driven by parcel volumes above plan. EBITDA was A$2.5M against a budget of A$2.6M, a shortfall of A$0.1M. The EBITDA margin was 10.8% against a budgeted 11.4%. The margin gap reflects lower average yield per parcel and slightly higher depot costs, partly offset by better direct delivery cost per parcel.

- Revenue: A$23.1M year to date (budget A$22.8M). September revenue was A$7.9M (budget A$7.7M).
- EBITDA: A$2.5M year to date (budget A$2.6M). September EBITDA was A$0.9M, on budget.
- Net profit after tax: A$0.4M (budget A$0.5M).
- Volume: 4.0 million parcels delivered (budget 3.9 million).
- Net debt: A$27.6M at 30 September 2026 (budget A$27.8M), on existing bank debt of A$29.5M and cash of A$1.9M.
- Capex: A$1.4M against a budget of A$1.8M, with growth capex deferred pending completion of the refinancing.

2. Income statement

The table below compares year-to-date actuals with budget. Variances are shown as favourable or (unfavourable) to profit. Figures are in A$M and may not sum exactly because of rounding.

A$M, three months	Actual	Budget	Variance
Revenue	23.1	22.8	0.3
Direct delivery costs	(16.0)	(15.7)	(0.3)
Depot and hub costs	(3.6)	(3.5)	(0.1)
Corporate overheads	(1.0)	(1.0)	0.0
EBITDA	2.5	2.6	(0.1)
Depreciation and amortisation	(1.3)	(1.3)	0.0
EBIT	1.2	1.3	(0.1)
Net interest	(0.6)	(0.6)	0.0
Profit before tax	0.6	0.7	(0.1)
Income tax	(0.2)	(0.2)	0.0
Net profit after tax	0.4	0.5	(0.1)

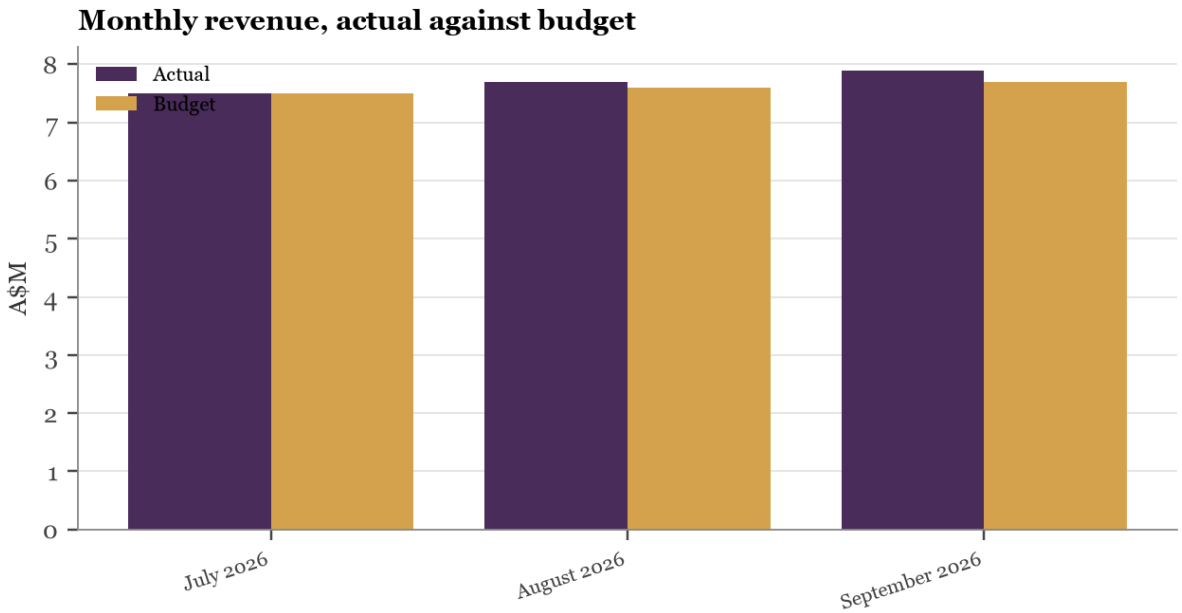

Year-to-date income statement against budget, to 30 September 2026

2.1 Variance commentary

Revenue was A$0.3M above budget. Higher volume added approximately A$0.6M, while average yield per parcel of A$5.78 against a budgeted A$5.85 reduced revenue by approximately A$0.3M. The yield shortfall reflects a mix shift towards higher-volume, lower-rate wholesaler and third-party logistics work, and a re-pricing concession agreed with one mid-sized client in July.

Direct delivery costs were A$0.3M above budget in dollar terms, but cost per parcel was A$4.00 against a budget of A$4.03. Volume accounted for the dollar overrun, and the lower unit cost reflects improved route density in Sydney and Melbourne and the first full quarter of the Eagle Farm automated sortation line. Depot and hub costs were A$0.1M above budget, mainly from lease escalations at the two southern depots and higher power costs at the Eagle Farm hub.

3. Operating performance

Monthly revenue, FY27 year to date. Actual totals A$23.1M and budget A$22.8M.

Metric	Actual	Budget
Parcels delivered (million)	4.0	3.9
Revenue per parcel (A$)	5.78	5.85
Direct cost per parcel (A$)	4.00	4.03
EBITDA margin (%)	10.8	11.4
Top client share of revenue (%)	33	n/a
Top three clients share of revenue (%)	60	n/a

Key operating metrics, three months to 30 September 2026

The group operated nine depots throughout the period, supported by approximately 285 full-time equivalent employees and 640 owner-driver contractors. For reference, the group delivered approximately 14.6 million parcels in FY26 on audited revenue of A$82.8M and EBITDA of A$9.1M, an FY26 revenue per parcel of A$5.67. Year-to-date yield is therefore above the FY26 average, although below the budget assumption.

The top client, a national online retailer, contributed approximately A$7.6M of year-to-date revenue, or 33% (FY26: 34%, A$28.2M). The top three clients represented 60% (FY26: 61%). Concentration is easing only marginally, and the largest contract remains subject to renewal in 2028 and termination for convenience on six months notice.

4. Balance sheet and net debt

A$M, 30 September 2026	Actual	Budget
Cash	1.9	1.7
Trade receivables	9.8	9.6
Trade payables and accruals	(8.1)	(7.9)
Bank debt (existing facilities)	(29.5)	(29.5)
Net debt	27.6	27.8

Selected balance sheet items and net debt

Receivables equate to approximately 39 days of revenue, in line with the prior quarter. Net debt of A$27.6M represents approximately 3.0 times last-twelve-month EBITDA of A$9.3M (FY26 EBITDA of A$9.1M, plus A$2.5M for the current quarter, less A$2.3M for the equivalent quarter last year). This is not comparable with the pro forma net leverage of 3.9x quoted in the refinancing materials, which is calculated on FY26 audited EBITDA and the proposed A$38.0M facility.

5. Cash flow and capital expenditure

A$M, three months	Actual	Budget
Opening cash	2.0	2.0
EBITDA	2.5	2.6
Working capital movement	(0.4)	(0.3)
Net interest paid	(0.6)	(0.6)
Tax paid	(0.2)	(0.2)
Capital expenditure	(1.4)	(1.8)
Closing cash	1.9	1.7

Summary cash flow, three months to 30 September 2026

Capital expenditure comprised A$0.5M of maintenance and replacement spend (on budget) and A$0.9M of growth spend (budget A$1.3M). Growth spend related to design, deposits and site preparation for further sortation automation and fleet electrification. Management has not committed to further growth capex until the refinancing is complete. The depot fit-out and automation capex plan was reviewed by Tolland Quantity Surveyors Pty Ltd, whose report is dated 26 August 2026.

The working capital outflow of A$0.4M was driven by receivables growth on higher September billings and the timing of fuel and contractor payment runs. Management expects most of it to reverse in October.

6. Refinancing update

The proposed senior secured term loan remains subject to credit approval. The key terms currently under negotiation are summarised below.

Item	Detail
Facility	Senior secured term loan, A$38.0M
Tenor	60 months, bullet with 1.0% p.a. amortisation
Indicative pricing	3-month BBSW plus 6.25% p.a.
Fees	2.00% establishment; 1.00% p.a. on undrawn
Refinance of bank debt	A$29.5M
Capex (automation, electrification)	A$6.0M
Costs and working capital	A$2.5M

Proposed facility terms and uses of funds (indicative)

On the proposed structure, pro forma gross debt is A$38.0M, cash is A$2.5M and net debt is A$35.5M. This represents net leverage of 3.9x and interest cover of 2.3x on FY26 audited EBITDA of A$9.1M. The independent valuation by Harcourt Beale Advisory Pty Ltd, dated 21 August 2026, supports an enterprise value of A$62.0M, giving a loan to value ratio of 61.3%. A term sheet is expected on 23 October 2026. Merriweather Kent Chartered Accountants has completed its audit of the FY26 financial statements, and the figures in the Information Memorandum dated 3 August 2026 have been confirmed.

7. Risks and items under watch

- Yield: the A$0.07 per parcel shortfall against budget is the main driver of the EBITDA variance. Management is reviewing the pricing of two lower-margin accounts at their next renewal.
- Customer concentration: the top client and top three clients represent 33% and 60% of year-to-date revenue respectively. Management continues to prioritise new wholesaler and third-party logistics wins.
- Contractor model: no change to the owner-driver arrangements in the period. Legal advice on employment law reform is being monitored, as any reclassification would increase labour costs.
- Fuel pass-through: the fuel adjustment mechanism lags pump prices by approximately one billing cycle. Any sustained rise would temporarily reduce margin.
- Leverage headroom: with interest cover of 2.3x pro forma, a volume shock or margin decline would leave limited headroom.
- Execution: Sydney and Melbourne density and the sortation programme remain the primary drivers of forecast productivity gains.
- Key person: Daniel Rourke remains central to client relationships. Succession planning is on the agenda for the next Board meeting.

8. Outlook

October and November volumes are expected to track at or above budget as retail peak-season onboarding begins. Management expects the yield gap to narrow modestly over the second quarter as fuel adjustments and volume rebates take effect, but does not expect to recover the full year-to-date margin shortfall before December. Full-year guidance is unchanged at this stage, with a downside bias to EBITDA margin if yield pressure persists.

9. Basis of preparation

These management accounts are unaudited and have been prepared on an accruals basis consistent with the accounting policies in the audited FY26 financial statements. Budget figures are those approved by the Board for FY27. Comparative FY26 figures are drawn from the audited statements. Net interest is calculated on existing bank facilities only and excludes any costs associated with the proposed refinancing. Amounts are in Australian dollars and rounded to the nearest A$0.1M, so totals may not add exactly.
