Date: 9 February 2026

Synthetic - for demonstration. All names, entities and figures are fictional.
Confidential. Prepared for the addressee only and not to be relied on by any other party.

1. Important notice

This information memorandum has been prepared by Corliss & Grant Advisory on behalf of Frostline Cold Storage Pty Ltd (the Company) for the sole purpose of inviting indicative interest from prospective lenders in the facility described in section 3. It is provided on a confidential basis and must not be copied or distributed to any other person without the Company's written consent.

The information has been compiled from material supplied by the Company and its sponsor. It has not been independently verified. Financial figures for the last twelve months (LTM) are drawn from management information and are unaudited pending the finalisation of the audited financial statements. The portfolio market value of A$368.0M is the Company's current working figure. The independent valuation by Calloway Hartigan Valuers Pty Ltd and the independent quantity surveyor's report by Pemberton Raine Quantity Surveyors Pty Ltd have not yet been delivered, and their conclusions may differ from the figures in this document. Indicative terms are subject to credit approval, due diligence and final documentation. Nothing in this document is a commitment to lend or an offer capable of acceptance.

2. Transaction summary

Borrower	Frostline Cold Storage Pty Ltd
ABN	74 505 998 193
Registered office	Level 2, 118 Whitehall Street, Yarraville VIC 3013
Sponsor	Northbridge Infrastructure Partners Fund II, acting through Northbridge Infrastructure Management Pty Ltd
Sector	Industrial and logistics infrastructure: temperature-controlled (cold chain) storage and distribution
Facility	Senior secured delayed-draw growth capex term facility
Facility limit	A$63.0M
Tenor	60 months
Document date	9 February 2026
Version	1.0
Prepared by	Corliss & Grant Advisory
Prepared for	Prospective senior secured lenders

Table 1: Key details

2.1 Overview

Frostline operates five temperature-controlled warehousing and distribution facilities across Melbourne's western, south-eastern and northern industrial precincts. The portfolio provides about 61,200 pallet positions across 74,500 square metres of gross floor area. Customers include food manufacturers, importers, supermarket and foodservice distributors, and pharmaceutical logistics operators. The Company owns the freehold of all five sites.

The Company seeks a A$63.0M senior secured delayed-draw term facility to part-fund a A$78.5M growth programme comprising a 14,500 pallet position expansion at Truganina and an automated storage and retrieval system (ASRS) retrofit at Dandenong South. The remaining A$15.5M will be funded by sponsor equity contributed ahead of the first drawdown.

2.2 Investment highlights

- Scale and location: five freehold sites in Melbourne's main industrial precincts, with 88% utilisation in the most recent reporting period.
- Earnings base: LTM revenue of A$92.8M and LTM EBITDA of A$31.6M, an EBITDA margin of 34.1%.

- Contract support: 71% of revenue is contracted, including 19% under multi-year agreements with minimum pallet commitments.
- Conservative current gearing: net debt of A$112.4M is 3.6 times LTM EBITDA, and gross debt is 35.3% of the portfolio market value.
- Committed sponsor: Northbridge Infrastructure has held a majority interest since 2019 and will contribute A$15.5M of equity before the first drawdown.
- Hard asset security: freehold property with a market value of A$368.0M, of which land is A$96.5M.

2.3 Key considerations for lenders

Lenders should note that leverage rises materially on full drawdown. Pro forma gross debt of A$193.0M represents 52.4% of the current portfolio market value, before any contribution from the completed expansion. The expansion capacity is uncommitted, and its earnings depend on utilisation holding near current levels. These matters are addressed in sections 7 and 8.

3. The facility request

3.1 Purpose and structure

The facility is a delayed-draw term facility with a limit of A$63.0M and a tenor of 60 months. It will be drawn in stages against construction progress, with drawdowns supported by independent quantity surveyor certification. Sponsor equity of A$15.5M will be fully contributed before the first drawdown, so that the lenders' funds rank behind a committed equity layer throughout construction.

Item	A$M	% of total
Senior facility (this request)	63.0	80.3%
Sponsor equity	15.5	19.7%
Total sources	78.5	100.0%
Truganina expansion and Dandenong South ASRS retrofit (total development cost)	78.5	100.0%

Table 2: Sources and uses of funds

3.2 Indicative pricing

The following terms are indicative only and remain subject to credit approval and final terms.

Component	Indicative terms
Margin on drawn amounts	3 month BBSW plus 4.75% p.a.
Establishment fee	1.50% of the facility limit (A$0.95M)
Commitment fee	1.25% p.a. on undrawn amounts
Tenor	60 months
Ranking	First ranking senior secured

Table 3: Indicative pricing and terms

On a fully undrawn facility, the commitment fee would be about A$0.79M per annum. The Company expects to run a hedging programme over the drawn floating rate exposure, and proposes that its minimum scope be agreed with lenders in the term sheet.

4. Borrower and sponsor

4.1 Company history

Frostline was founded in 2009 by the McAllister family and has grown from a single Dandenong South cold store to a five-site freehold portfolio. Northbridge Infrastructure acquired a majority interest in 2019. The founding family retained a minority holding and continues in management roles.

Date	Event
14 Aug 2009	Founded with a single 7,800 pallet position cold store at Dandenong South
3 Nov 2014	Laverton North facility commissioned, extending the network into Melbourne's west
28 Mar 2019	Northbridge Infrastructure acquired a majority interest; founding family retained a minority holding and management roles
20 Jun 2022	Truganina facility opened with 16,400 pallet positions, including a pharmaceutical-grade temperature zone
12 Sep 2024	Derrimut site acquired and brought into operation, taking the portfolio to five freehold sites

Table 4: Company milestones

4.2 Board and management

- Fiona McAllister, Managing Director and Chief Executive Officer.
- Dimitri Kalogeropoulos, Executive Director and Chief Financial Officer.
- Rohan Verhoeven, Non-executive Director (Northbridge Infrastructure nominee).

The Company's auditor is Ashgrove Whitlam Chartered Accountants. Ellery & Stroud Corporate Advisory Pty Ltd acts as corporate adviser to the Company.

4.3 Sponsor

Northbridge Infrastructure holds its interest through Northbridge Infrastructure Partners Fund II, acting through Northbridge Infrastructure Management Pty Ltd. The sponsor has been a majority owner for almost seven years and nominates one director to the Company's board. Its A$15.5M equity commitment to the growth programme is a condition of the facility, and it will be contributed before the first drawdown.

5. Portfolio and operations

5.1 Sites

Site	Precinct	Notes
Dandenong South	South-east	Original 2009 site; ASRS retrofit proposed
Laverton North	West	Commissioned November 2014
Somerton	North	Operating site
Truganina	West	Opened June 2022 with 16,400 positions; 14,500 position expansion proposed
Derrimut	West	Acquired and operating from September 2024

Table 5: Portfolio sites

The portfolio holds about 61,200 pallet positions. At 88% utilisation, about 53,900 positions were occupied in the most recent reporting period. LTM revenue of A$92.8M equates to about A$1,516 per pallet position. Three of the five sites are in Melbourne's western precinct, which is a growth corridor for supermarket, foodservice and import distribution.

5.2 Services and customers

Frostline provides storage, handling and transport services under a mix of arrangements. Customers include food manufacturers, importers, supermarket and foodservice distributors, and pharmaceutical logistics customers. The Truganina pharmaceutical-grade temperature zone supports the pharmaceutical segment, which carries more demanding compliance requirements than food storage.

5.3 Revenue contracting

Contracted revenue is 71% of the total. This includes about 19% under multi-year agreements with minimum pallet commitments and a further 52% under written customer agreements with shorter terms. The remaining 29% is on rolling storage and handling terms without minimum commitments. The largest customers represent a significant share of revenue, and a detailed customer concentration schedule will be provided in the data room.

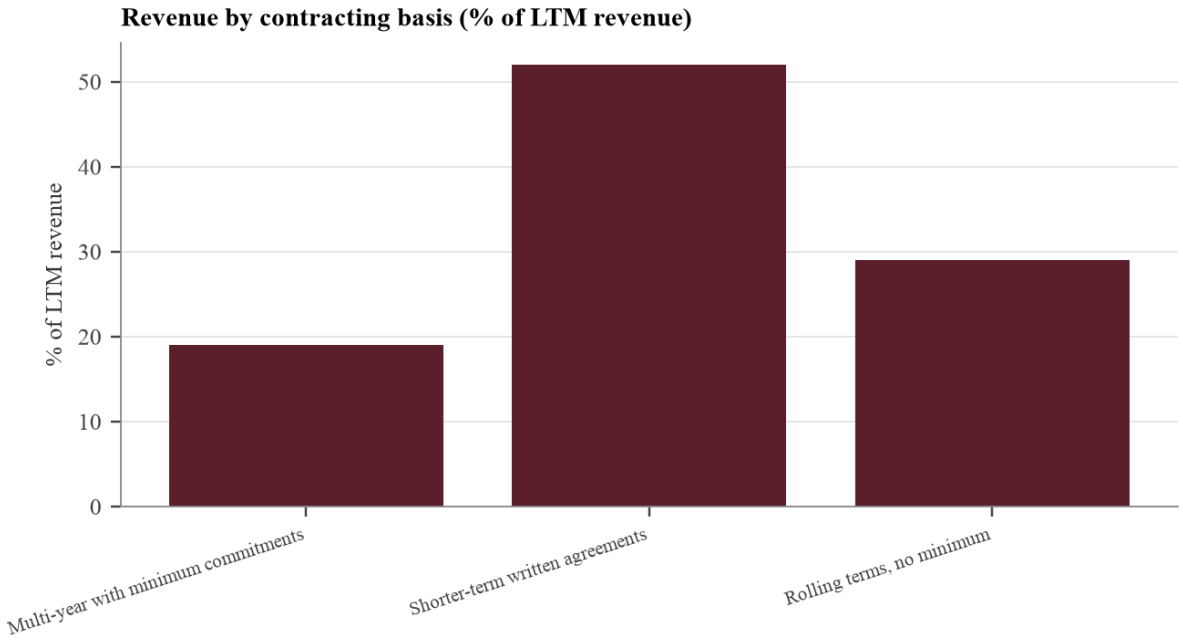

Figure 1: Revenue by contracting basis. Contracted revenue (the first two categories) totals 71%.

6. Security and valuation

6.1 Security package

The facility will be secured by first ranking security over all present and after-acquired property of the Company, including a registered mortgage over the freehold of all five sites, together with security over the Truganina and Dandenong South project assets, key contracts, insurances and accounts. Sponsor equity subordination and share security terms will be settled in the term sheet.

6.2 Valuation

The Company's current working market value for the portfolio is A$368.0M, of which land is A$96.5M (26.2% of market value). Calloway Hartigan Valuers Pty Ltd has been instructed to provide an independent valuation, expected to be dated 2 March 2026. Lenders should treat the figures below as indicative until that report is available. The valuation will be sought on both an as-is basis and an as-if-complete basis for the Truganina expansion.

Metric	Current	Pro forma
Portfolio market value (A$M)	368.0	368.0
Gross debt (A$M)	130.0	193.0
Gross debt to market value (LVR)	35.3%	52.4%
Land value (A$M)	96.5	96.5

Table 6: Security cover at current market value

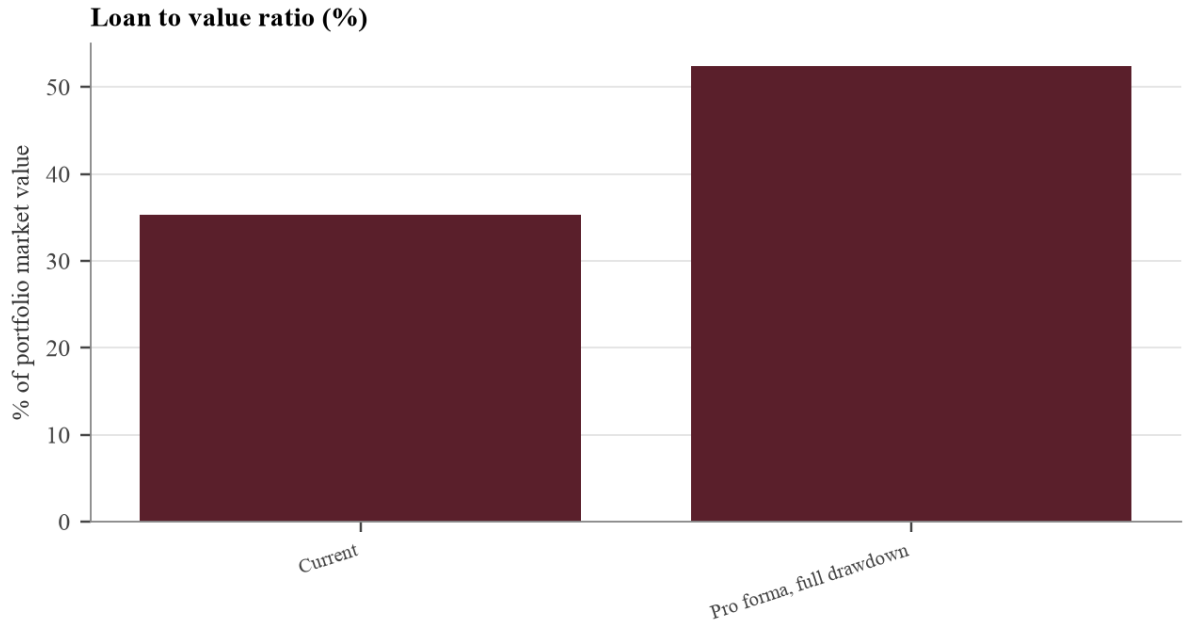

Figure 2: LVR on current market value. The pro forma figure ascribes no value to the completed expansion.

The pro forma LVR of 52.4% is calculated on the current market value and attributes no value to the completed works. The as-if-complete valuation is expected to show a lower ratio once the added capacity is reflected.

7. Financial position

7.1 Summary

Measure	A$M / ratio
LTM revenue	92.8
LTM EBITDA	31.6
EBITDA margin	34.1%
Gross debt	130.0
Cash	17.6
Net debt	112.4
Net debt to LTM EBITDA	3.6x
Gross debt to portfolio market value	35.3%

Table 7: Financial summary, last twelve months

The LTM figures are management information. The audited financial statements, prepared by Ashgrove Whitlam Chartered Accountants, are expected to be available on 20 February 2026 and will be provided to lenders on release. A management accounts update is scheduled for 16 April 2026.

7.2 Pro forma leverage

If the facility is fully drawn and cash is unchanged, gross debt rises from A$130.0M to A$193.0M, or 6.1 times LTM EBITDA. Net debt rises to A$175.4M, or 5.6 times LTM EBITDA. These ratios use LTM earnings only and make no allowance for the expansion. Because the equity contribution funds the first part of the programme, the leverage increase occurs progressively through the construction period and peaks before expansion earnings are realised. Lenders should assess the facility on that basis.

7.3 Financial model

A lender financial model, with base and downside cases, will be provided in the data room. The downside case will test lower utilisation on the new capacity, delayed commissioning and higher energy costs. The Company's corporate adviser, Ellery & Stroud Corporate Advisory Pty Ltd, will support lender queries on the model.

8. The growth programme

8.1 Truganina expansion

The Truganina expansion adds 14,500 pallet positions. It increases site capacity from 16,400 to 30,900 positions and portfolio capacity from about 61,200 to about 75,700 positions, an increase of 23.7%. The pharmaceutical-grade temperature zone established in 2022 is part of the existing site and the Company expects the expansion to serve the same customer segments.

8.2 Dandenong South ASRS retrofit

The ASRS retrofit at Dandenong South, the Company's original site, introduces automated storage and retrieval to an existing facility. It involves commissioning of automated equipment in an operating warehouse, which carries execution risk during the works. Pemberton Raine Quantity Surveyors Pty Ltd has been instructed to review the cost plan, programme and contingency, with its report expected on 10 March 2026.

8.3 Cost and funding

The total development cost of the programme is A$78.5M. Of this, A$63.0M (80.3%) would be funded by the facility and A$15.5M (19.7%) by sponsor equity. A split of cost between the two projects, together with the contingency allowance and the procurement approach, will be confirmed once the quantity surveyor's report is complete.

9. Key risks and mitigants

The table below summarises the principal risks identified by the Company and the mitigants proposed for discussion with lenders. It is not exhaustive.

Risk	Proposed mitigant
Construction cost, delay and commissioning of automated equipment	Quantity surveyor certification of drawdowns; contingency review; fixed price or capped contract terms sought as a condition precedent
Energy cost and supply; partial pass-through	Review of customer pass-through terms; energy procurement and hedging policy agreed with lenders
Customer concentration; 29% of revenue on rolling terms	Customer schedule and contract review in due diligence; reporting of top customer exposure
Leverage rises to 52.4% pro forma LVR before expansion earnings	Equity contributed first; as-if-complete valuation; financial covenants and distribution lock-up
Floating rate exposure	Minimum hedging requirement over drawn amounts
Refrigerant phase-down and food and pharmaceutical compliance	Technical review of plant and refrigerant plans; compliance reporting and licence undertakings
Uncommitted expansion capacity; reliance on utilisation near 88%	Downside case in the model; pre-leasing or utilisation milestones for later drawdowns

Table 8: Key risks and proposed mitigants

10. Proposed covenants and undertakings

The Company anticipates that lenders will require terms customary for a senior secured construction and term facility. The following are proposed as a starting point, with levels to be set in the term sheet after lender feedback.

- Financial covenants: a maximum LVR, tested on the independent valuation, and an interest cover test, with an initial period adjusted for construction.
- Distribution restrictions until the expansion is complete and covenant tests are met.
- Hedging of an agreed proportion of drawn floating rate debt.
- Reporting: monthly construction reports during the works, quarterly management accounts with utilisation and customer concentration data, and annual audited accounts.
- Information undertakings, including notice of material customer losses, insurance claims and regulatory breaches.
- Annual or lender-requested valuations on a basis acceptable to lenders.

11. Conditions precedent

11.1 Conditions to first drawdown

- Contribution in full of A$15.5M of sponsor equity.
- Delivery of the independent valuation, the quantity surveyor's report and a satisfactory technical review.
- Executed construction contracts and building approvals for both projects.
- Executed security documents and registrations over all five freehold sites.
- Evidence of insurance, including contract works and public liability cover, noting lenders' interests.
- Hedging arrangements in place in line with the agreed policy.
- Customary corporate authorisations, legal opinions and know your customer checks.

11.2 Conditions to each subsequent drawdown

- Quantity surveyor certification of cost to date, cost to complete and programme.
- No default and compliance with financial covenants.
- Evidence that the project remains fully funded.

12. Process and timetable

Date	Milestone
9 Feb 2026	Information memorandum issued
20 Feb 2026	Audited financial statements expected
2 Mar 2026	Independent valuation report expected (Calloway Hartigan)
10 Mar 2026	Quantity surveyor's report expected (Pemberton Raine)
16 Apr 2026	Updated management accounts
6 May 2026	Indicative term sheet targeted

Table 9: Indicative process timetable

Prospective lenders, including Quillwood Credit Partners, are invited to register interest and request access to the data room. Questions should be directed to Corliss & Grant Advisory. Dates are indicative and may change. Corliss & Grant Advisory will notify all participating lenders of any material change.
