Entity	Frostline Cold Storage Pty Ltd
ABN	74 505 998 193
Registered office	Level 2, 118 Whitehall Street, Yarraville VIC 3013
Reporting period	Nine months to 31 March 2026 (FY26 year to date)
Date of pack	16 April 2026
Prepared by	Finance team, under the direction of Dimitri Kalogeropoulos, CFO
Prepared for	Board of Directors, including Northbridge Infrastructure nominee
Status	Unaudited. Version 1.0

Document details

1. Summary

Frostline traded ahead of budget for the nine months to 31 March 2026. Revenue was A$70.1M against a budget of A$68.9M, and EBITDA was A$23.9M against a budget of A$23.3M. The EBITDA margin was 34.1% against a budgeted 33.8%. Electricity costs ran above budget and were more than offset by higher storage and handling revenue and lower repairs and maintenance spend.

- Revenue is A$1.2M (1.7%) ahead of budget, led by storage (A$0.6M) and handling (A$0.5M).
- EBITDA is A$0.6M (2.6%) ahead of budget. Last twelve months (LTM) revenue is A$92.8M and LTM EBITDA is A$31.6M.
- Portfolio utilisation was 88% at 31 March 2026, against a budget of 87%.
- Gross debt is A$130.0M and cash is A$17.6M, giving net debt of A$112.4M and net debt to LTM EBITDA of 3.6x.
- Loan to value ratio (LVR) is 35.3% on the Calloway Hartigan Valuers market value of A$368.0M dated 2 March 2026.
- Pre-construction spend on the Truganina expansion and Dandenong South ASRS retrofit is A$3.8M, below the A$4.5M budgeted. No growth facility has been drawn.

2. Year to date results against budget

The table below sets out the consolidated result for the nine months to 31 March 2026. Variances are shown as favourable or (unfavourable) to budget. Amounts are in A$ million.

Net finance costs were A$0.1M below budget because the average drawn balance was slightly lower than planned. Tax has not been provided for in this pack and is calculated at the half-year and year-end reporting dates.

Line item	Actual	Budget	Fav / (unfav)
Revenue	70.1	68.9	1.2
Operating costs	(46.2)	(45.6)	(0.6)
EBITDA	23.9	23.3	0.6
Depreciation and amortisation	(6.2)	(6.3)	0.1
EBIT	17.7	17.0	0.7
Net finance costs	(7.4)	(7.5)	0.1
Profit before tax	10.3	9.5	0.8

Table 1: Summary income statement, nine months to 31 March 2026 (A$M)

3. Revenue

Storage revenue is driven by occupied pallet positions and rates under rolling and contracted terms. Handling revenue reflects pallet movements in and out of the five sites. Transport and distribution is the most sensitive to customer mix and was marginally behind budget.

Approximately 29% of revenue is on rolling storage and handling terms without minimum pallet commitments. This share is unchanged from the prior reporting period. Rolling revenue held up through the peak seasonal period for food manufacturers and supermarket distributors, and no material customer exits occurred in the quarter.

Revenue stream	Actual	Budget	Fav / (unfav)
Storage	31.2	30.6	0.6
Handling	24.6	24.1	0.5
Transport and distribution	11.4	11.5	(0.1)
Other income	2.9	2.7	0.2
Total revenue	**70.1**	**68.9**	**1.2**

Table 2: Revenue by stream, nine months to 31 March 2026 (A$M)

4. Operating costs

Electricity was A$0.5M (5.5%) over budget. Wholesale prices in the summer months were higher than assumed, and the pass-through provisions in customer agreements recover only part of the increase, with a lag. Labour was A$0.2M over budget on additional casual hours during seasonal peaks. Repairs and maintenance was A$0.2M under budget because two planned refrigeration plant overhauls moved into the fourth quarter.

Cost line	Actual	Budget	Fav / (unfav)
Electricity	9.6	9.1	(0.5)
Labour	17.2	17.0	(0.2)
Repairs and maintenance	3.2	3.4	0.2
Transport subcontractors	5.6	5.5	(0.1)
Other site and corporate costs	10.6	10.6	0.0
Total operating costs	**46.2**	**45.6**	**(0.6)**

Table 3: Operating costs, nine months to 31 March 2026 (A$M)

5. Operating metrics

The portfolio provides 61,200 pallet positions across 74,500 square metres of gross floor area. Utilisation by site at 31 March 2026 is set out below.

Dandenong South remains the most heavily used site and is the location of the planned ASRS retrofit. Derrimut, brought into operation in September 2024, continues to ramp up and has the most available capacity. Management expects utilisation at Derrimut to improve as new customer onboarding completes in the fourth quarter.

Site	Pallet positions	Utilisation
Dandenong South	14,200	91%
Laverton North	11,800	87%
Somerton	10,600	86%
Truganina	16,400	89%
Derrimut	8,200	84%
Portfolio	**61,200**	**88%**

Table 4: Pallet positions and utilisation by site, 31 March 2026

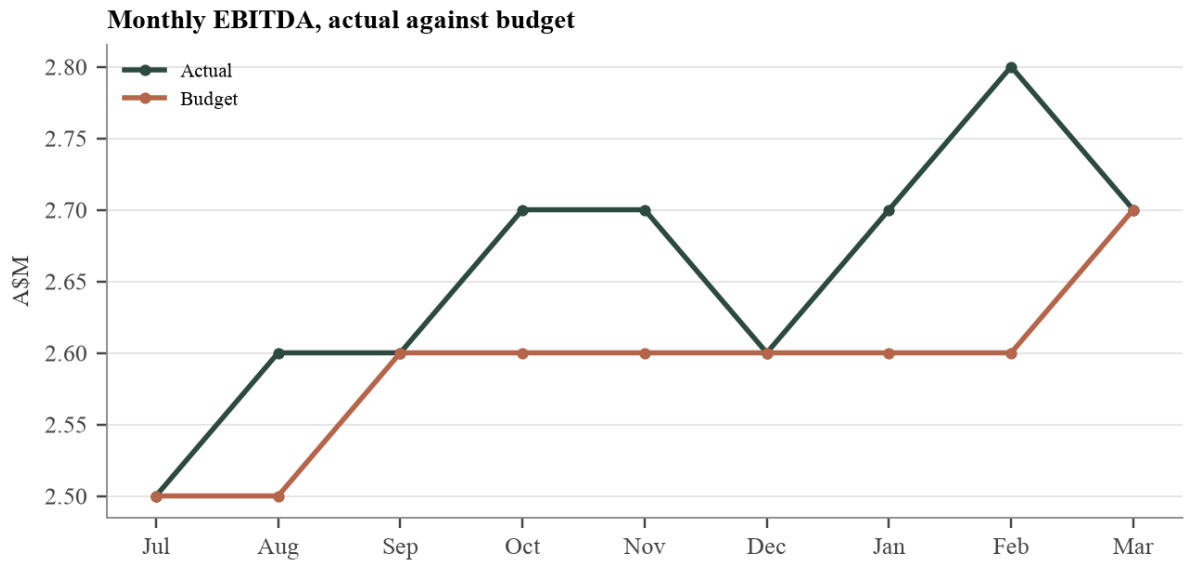

Figure 1: Monthly EBITDA, July 2025 to March 2026. Actual totals A$23.9M and budget totals A$23.3M.

6. Balance sheet, debt and leverage

Net debt to LTM EBITDA is 3.56x before rounding. LTM net finance costs are approximately A$9.9M, giving LTM EBITDA interest cover of about 3.2x. Debt is floating rate and the hedging programme continues to operate within board policy. The Treasury report to the Board covers hedge cover and maturities.

Measure	31 March 2026
Gross debt (A$M)	130.0
Cash (A$M)	17.6
Net debt (A$M)	112.4
LTM EBITDA (A$M)	31.6
Net debt to LTM EBITDA	3.6x
Portfolio market value (A$M)	368.0
Of which land value (A$M)	96.5
LVR (gross debt to market value)	35.3%

Table 5: Debt and leverage metrics

The A$63.0M senior secured delayed-draw growth capex facility sought from Quillwood Credit Partners remains subject to credit approval, and the term sheet is expected on 6 May 2026. If the facility were fully drawn against the current valuation, LVR would rise to 52.4%, before any uplift in value from the completed expansion. Pro forma leverage and covenant headroom will be reported once final terms are agreed.

7. Capital expenditure and expansion project

The Truganina expansion (14,500 additional pallet positions) and the Dandenong South ASRS retrofit have a combined total development cost of A$78.5M. The proposed funding is the A$63.0M facility and A$15.5M of sponsor equity from Northbridge Infrastructure, contributed ahead of the first drawdown. The Pemberton Raine Quantity Surveyors report dated 10 March 2026 is the basis for the cost plan. Pre-construction spend to date covers design, approvals and early procurement, and has been funded from operating cash flow. The underspend reflects the timing of design milestones and not a change in scope.

Capex category	Actual	Budget	Fav / (unfav)
Maintenance capex	2.1	2.4	0.3
Expansion pre-construction costs	3.8	4.5	0.7
Total capex	**5.9**	**6.9**	**1.0**

Table 6: Capital expenditure, nine months to 31 March 2026 (A$M)

8. Outlook and key matters for the Board

Management forecasts FY26 revenue of A$93.4M and EBITDA of A$31.8M, against budgets of A$91.9M and A$31.2M. The forecast assumes utilisation of 88% to 89% and fourth quarter EBITDA of A$7.9M. The Board should note the following.

- Energy: electricity is the largest cost variance. Management is reviewing the retail supply arrangements and the pass-through mechanisms in rolling customer terms.
- Customer concentration: the largest customers represent a significant share of revenue, and 29% of revenue is on rolling terms with no minimum commitments.
- Construction: cost, delay and commissioning risk on the expansion and automated equipment will be reported monthly once construction starts.
- Leasing: the expansion capacity is uncommitted and relies on utilisation holding near current levels.
- Refrigerants and compliance: plans for the phase-down of synthetic refrigerants and for food safety and pharmaceutical storage requirements are in progress and will be reported in the next pack.

9. Basis of preparation

These management accounts are unaudited and have been prepared from the general ledger and site operating systems for internal use. They have not been reviewed by Ashgrove Whitlam Chartered Accountants, who audited the most recent statutory financial statements. Budget figures are the FY26 board-approved budget. LTM figures combine the unaudited fourth quarter of FY25 with the nine months reported here. Property values are from the Calloway Hartigan Valuers report dated 2 March 2026. Figures may not sum exactly because of rounding.
