ABN	80 730 176 876
Registered address	41 Gilbert Road, Wingfield SA 5013
Sponsor	Ironleaf Partners Pty Ltd as manager of Ironleaf Partners Fund II
Facility	A$57.0M senior secured acquisition term facility, 60 months
Date	11 August 2025
Version	1.0
Prepared by	Pemberton Debt Advisory
Prepared for	Prospective senior lenders

Transaction particulars

Important notice

This information memorandum has been prepared by Pemberton Debt Advisory on behalf of Greenhaul Waste Services Pty Ltd and Ironleaf Partners Pty Ltd as manager of Ironleaf Partners Fund II. It is provided to a limited number of prospective lenders solely to assist them in deciding whether to proceed with a more detailed review of the proposed facility. It is confidential and must not be copied or disclosed to any other person without our written consent.

The information has been drawn from management, the sponsor and their advisers. It has not been independently verified by Pemberton Debt Advisory. Revenue and EBITDA figures for FY25 are management figures that remain subject to completion of the audit by Brandt Kessler Chartered Accountants. FY26 figures are forecasts prepared on the sponsor case and are inherently uncertain. Nothing in this document is a commitment to lend, and each recipient must make its own assessment and rely on its own enquiries. Valuation, technical, financial and legal due diligence reports referred to below are not yet final, and their conclusions may change the terms described here.

1. Executive summary

Ironleaf Partners Fund II (the Sponsor) has agreed to acquire the Greenhaul group (Greenhaul or the Group) from its founding shareholders at an enterprise value of A$112.0M. A share sale agreement was executed in July 2025 and is subject to financing and customary conditions. The Sponsor is seeking a A$57.0M senior secured acquisition term facility, with a five year tenor, to part fund the acquisition. The Sponsor will contribute A$60.0M of equity, which is 51.3% of total uses of A$117.0M.

Greenhaul is an Adelaide-headquartered provider of commercial and industrial waste collection, skip bin hire and materials recovery services across South Australia and Victoria. It operates three collection depots, a materials recovery facility (MRF) at Wingfield and a fleet of 74 collection vehicles, and services approximately 3,400 customers. About 71% of FY26 forecast revenue is contracted or recurring collection revenue.

The key credit features are set out below.

- Conservative gearing at the asset level: the facility represents 50.9% of the purchase enterprise value, and the Sponsor is investing A$60.0M of cash equity alongside it.
- Recurring earnings base: 71% of FY26 forecast revenue comes from contracted or recurring collection services, supported by a diversified customer base of commercial, construction and local government customers.
- Tangible security: plant and fleet carry an orderly liquidation value (OLV) of A$24.8M, equal to 43.5% of the facility limit, before any value attributed to the MRF, depots or the going concern.
- Moderate leverage: net debt at close of A$56.0M is 3.7x FY26 forecast EBITDA of A$15.2M, and 4.1x FY25 EBITDA of A$13.6M.
- Adequate coverage: forecast FY26 interest cover is 3.2x, while EBITDA less maintenance capital expenditure of A$6.1M leaves A$9.1M before tax and working capital to service interest and amortisation.

Headline metric	Value
Facility limit	A$57.0M
Enterprise value	A$112.0M
EV to FY26F EBITDA	7.4x
Facility to enterprise value (LVR)	50.9%
Sponsor equity	A$60.0M
Net debt at close	A$56.0M
Net leverage (FY26F EBITDA)	3.7x
Interest cover (FY26F)	3.2x

Table 1: Headline transaction and credit metrics

2. The transaction

2.1 Background and structure

The founding shareholders, the Ingram family, established the business in 2009 and have agreed to sell the Group to Ironleaf Partners Fund II. The Sponsor will acquire the Group through a newly established holding structure. Following completion, the Group will be restructured so that Greenhaul Waste Services Pty Ltd is the borrower under the facility and its material operating subsidiaries are guarantors.

The purchase price is on an enterprise value basis of A$112.0M, which includes the repayment of existing bank debt at completion. This equates to 7.4x FY26 forecast EBITDA of A$15.2M and 8.2x FY25 EBITDA of A$13.6M. The facility will be drawn in full at completion.

2.2 Sources and uses

Sources	A$M	Uses	A$M
Senior acquisition facility	57.0	Enterprise value, including refinancing of existing bank debt	112.0
Sponsor equity	60.0	Transaction costs and fees	4.0
		Cash to balance sheet	1.0
Total sources	**117.0**	**Total uses**	**117.0**

Table 2: Sources and uses of funds at completion

Transaction costs of A$4.0M include the facility establishment fee of A$1.14M (2.00% of the limit) and the balance of A$2.86M for advisory, due diligence, legal and other acquisition costs. Net debt at close is A$56.0M, being the facility of A$57.0M less A$1.0M of balance sheet cash.

2.3 Conditions to completion

The share sale agreement is conditional on the Sponsor obtaining financing and on customary conditions. The Sponsor has appointed Ellery Shaw Advisory to conduct financial due diligence, and Lowther Grey Lawyers act as legal counsel to the borrower. Lenders will receive reliance on the final reports, subject to customary reliance letters.

3. Business overview

3.1 History

Date	Event
March 2009	Founded in Adelaide by the Ingram family as a skip bin hire operator.
October 2015	Commissioned the materials recovery facility at Wingfield SA.
June 2019	Acquired Central Highlands Waste Pty Ltd, establishing a Victorian customer base.
February 2022	Opened the Dandenong South VIC depot and expanded the commercial collection fleet.
July 2025	Executed a share sale agreement with the founding shareholders for sale to Ironleaf Partners Fund II.

Table 3: Key milestones

3.2 Operations

Greenhaul provides commercial and industrial waste collection, skip bin hire and materials recovery services. Collection is run from three depots at Wingfield and Mount Gambier in South Australia and at Dandenong South in Victoria. The Group employs 286 full time equivalent staff and operates a fleet of 74 collection vehicles.

The Wingfield MRF sorts mixed commercial and construction waste into cardboard, metals, plastics and residual streams. Recovery diverts volume from landfill, which reduces disposal cost and levy exposure for Greenhaul and its customers. Sales of sorted cardboard, metals and plastics supplement collection revenue.

3.3 Customers and revenue mix

Greenhaul services approximately 3,400 commercial, construction and local government customers. Of FY26 forecast revenue of A$118.4M, about 71% (approximately A$84.1M) is derived from contracted or recurring collection services. The balance of approximately A$34.3M is transactional, comprising skip bin hire and construction and demolition work, together with commodity sales.

The recurring base provides earnings visibility, while the transactional portion adds volume leverage in strong construction markets and is the part of the book most exposed to a cyclical downturn. Lenders should review customer contract terms, tenor and indexation provisions in the data room. Contract review forms part of the legal due diligence.

4. Sponsor and management

4.1 Sponsor

Ironleaf Partners Pty Ltd is the manager of Ironleaf Partners Fund II, which is the acquiring entity. The Sponsor is committing A$60.0M of equity to the transaction, which ranks behind the senior facility. Equity will be funded in cash at completion, so there is no deferred or contingent equity component in the capital structure presented to lenders.

4.2 Board and management

Daniel Ingram	Managing Director and Chief Executive Officer
Priya Iredale	Executive Director and Chief Financial Officer
Stephen Kallis	Non-executive Chair (Ironleaf Partners nominee)

Board of Greenhaul Waste Services Pty Ltd

Continuity of the operating team is important to the credit case. Management retention and incentive arrangements will be confirmed to lenders as part of the term sheet process. The Sponsor's nominee will chair the board and will have oversight of budget, capital expenditure and acquisition decisions.

5. Financial overview

5.1 Trading performance

A$M unless stated	FY25	FY26F
Revenue	106.9	118.4
Revenue growth (%)	n/a	10.8
EBITDA	13.6	15.2
EBITDA margin (%)	12.7	12.8
Maintenance capex	n/a	6.1
EBITDA less maintenance capex	n/a	9.1

Table 4: Summary financials (FY25 unaudited, FY26 sponsor case forecast)

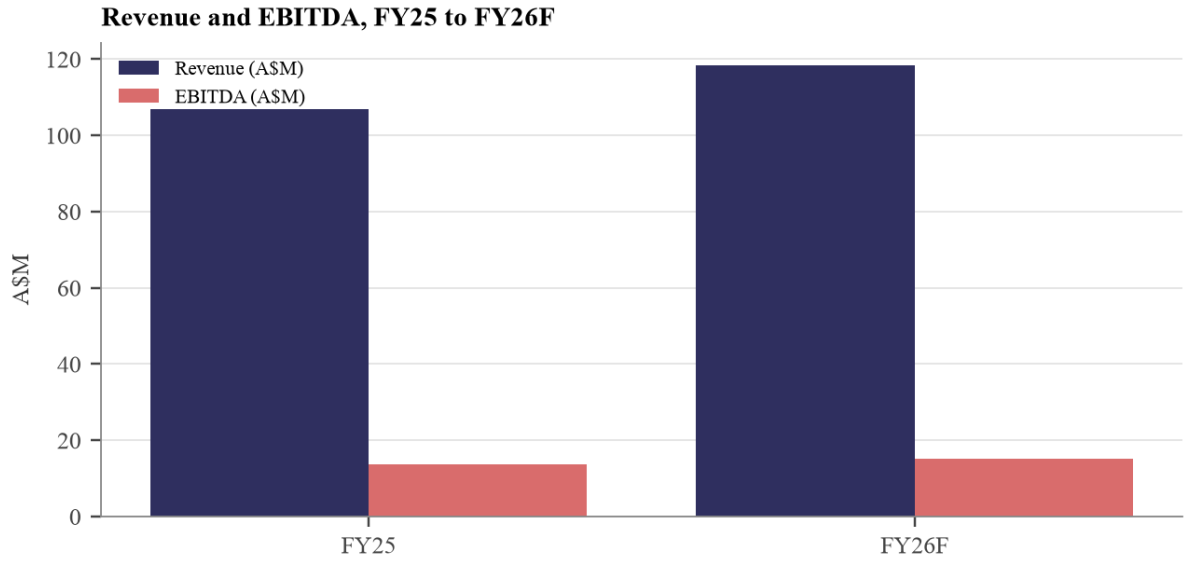

Figure 1: Revenue and EBITDA, FY25 and FY26 forecast. Source: management, sponsor case.

Forecast revenue growth of 10.8% and EBITDA growth of 11.8% in FY26 are supported by the full year effect of fleet additions and the recurring contract base. The EBITDA margin is broadly flat at 12.8% against 12.7% in FY25, so the forecast does not rely on margin expansion. Lenders should note that the FY26 commodity price assumptions in the sponsor case are conservative, and that the same basis should not be assumed for later years.

5.2 Capital expenditure

Maintenance capital expenditure is forecast at A$6.1M in FY26, which is 40.1% of forecast EBITDA. This is a material call on cash flow and reflects the replacement cycle of collection vehicles, bins and MRF plant. Corrigan Mott Engineering has been appointed as independent technical and capex adviser and is expected to report on the adequacy of the maintenance plan and the condition of the fleet and the MRF.

5.3 Pro forma credit metrics

Metric	Value
Net debt at close	A$56.0M
Net debt to FY25 EBITDA	4.1x
Net debt to FY26F EBITDA	3.7x
Interest cover, FY26F EBITDA to cash interest	3.2x
Facility to enterprise value	50.9%
Plant and fleet OLV to facility limit	43.5%
EBITDA less maintenance capex to interest and amortisation	1.7x

Table 5: Pro forma credit metrics at completion

Cash interest of approximately A$4.75M in FY26 is illustrative, calculated on the A$57.0M limit at a margin of 4.75% per annum over an assumed 3 month BBSW of approximately 3.6%. Scheduled amortisation is A$0.57M per annum. The final measure in Table 5 is calculated before tax and working capital movements and is therefore a guide only. Ellery Shaw Advisory will report on working capital, tax and cash conversion in its financial due diligence.

6. Proposed facility

Borrower	Greenhaul Waste Services Pty Ltd (following the post-acquisition group restructure)
Facility type	Senior secured acquisition term facility
Limit	A$57.0M
Tenor	60 months from financial close
Repayment	Bullet at maturity, with 1.0% per annum amortisation (A$0.57M per annum)
Purpose	To part fund the acquisition of the Greenhaul group by Ironleaf Partners Fund II at an enterprise value of A$112.0M, including refinancing of existing bank debt, transaction costs and A$1.0M of balance sheet cash
Margin	3 month BBSW plus 4.75% per annum
Establishment fee	2.00% of the limit (A$1.14M)
Commitment fee	1.00% per annum on undrawn amounts
Covenants	Interest cover and leverage, tested quarterly

Table 6: Indicative terms (subject to the term sheet)

The facility is expected to be drawn in full at completion, so the commitment fee will apply only between the date of commitment and drawdown. After five years of 1.0% annual amortisation, the balance at maturity would be A$54.15M, or 95.0% of the original limit. Repayment therefore depends on refinancing or a sale of the Group, and lenders should assess the credit on that basis.

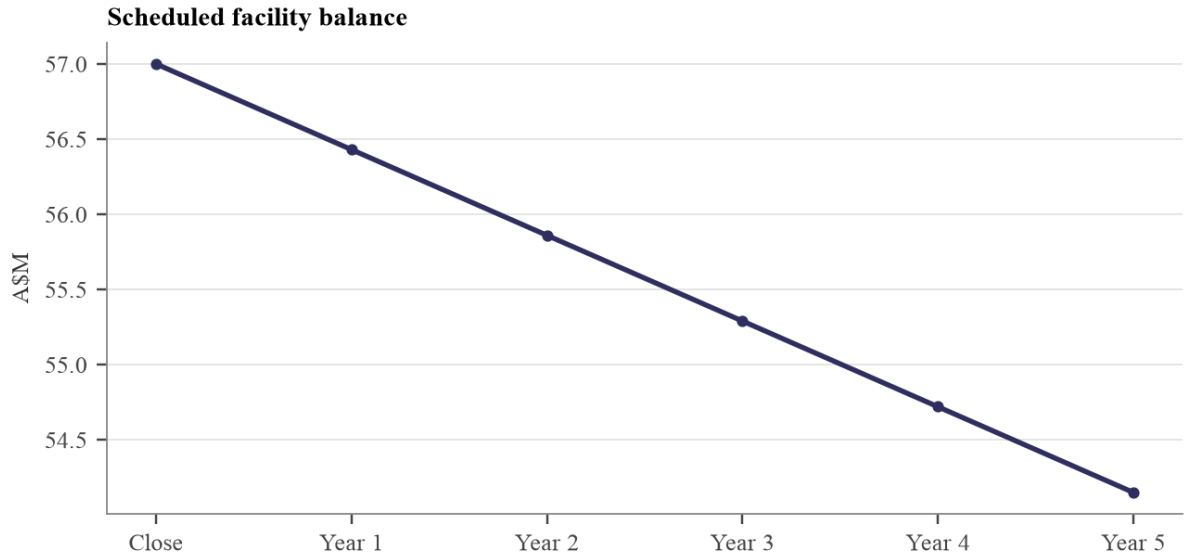

Figure 2: Scheduled facility balance assuming 1.0% per annum amortisation and no voluntary prepayment.

7. Security and valuation

7.1 Security package

The facility is proposed to be secured by first ranking security over all present and after acquired property of the borrower and each guarantor, a share charge over the borrower and each material subsidiary, and cross guarantees from the Group's material operating entities. Mortgages over freehold real property will be taken where the Group holds it, subject to title and legal due diligence. The Sponsor's equity and any shareholder funding will be subordinated to the facility.

7.2 Valuation support

The purchase enterprise value of A$112.0M implies a facility to value ratio of 50.9%. Halvorsen Pearce Advisory has been engaged to provide an independent enterprise valuation, which is expected on 19 September 2025. Tallis Asset Valuers has assessed plant and fleet at an indicative OLV of A$24.8M. The OLV equals 43.5% of the facility limit, so the remaining 56.5% of the facility relies on the value of the going concern, the MRF and the depot network. Both valuations are subject to final reports, and lenders will receive reliance on them.

7.3 Technical and environmental review

Corrigan Mott Engineering is expected to report on 26 September 2025 on the condition of the fleet, the Wingfield MRF and the maintenance capital plan. The review will also cover EPA licence conditions, site contamination, fire protection and the adequacy of the insurance programme. We expect these matters to be conditions precedent to financial close.

8. Key risks and mitigants

Risk	Proposed mitigant
Landfill levy and regulatory change	Test contract pass-through rights in legal due diligence; sensitivity in the lender model.
Commodity price exposure	FY26 sponsor case assumes conservative prices; commodity revenue is a minor share of the total.
Construction downturn	Recurring revenue is 71% of FY26F; transactional volumes are sensitised.
Fleet, fuel and labour costs	Review indexation clauses; capex adviser to confirm fleet replacement plan.
MRF fire, contamination and licensing	Insurance review; EPA licence compliance in conditions precedent.
Leverage and headroom	Covenants set with defined headroom; Sponsor equity of A$60.0M ranks behind the facility.

Table 7: Principal risks and proposed mitigants

Landfill levy and regulatory change. Increases to South Australian or Victorian waste levies, or tighter recycling standards, may compress margins if they cannot be passed through under contract. Recurring contracts typically carry greater pass-through protection than transactional work, which is a point for confirmatory review.

Commodity prices. Revenue from recycled cardboard, metals and plastics is volatile. The sponsor case assumes conservative prices for FY26 only, so lenders should test later years independently.

Construction exposure. Skip bin and construction and demolition work is transactional and exposed to a downturn in building activity. This work forms part of the approximately 29% of FY26 revenue that is not recurring.

Fleet, fuel and labour. Movements in diesel prices, vehicle replacement cycles and driver availability may erode EBITDA if contract indexation lags cost increases.

Environmental and operational. The Wingfield MRF carries fire, contamination and licence compliance risk. Insurance and EPA licence conditions will need continuing monitoring by the borrower and by the lenders' technical adviser.

Leverage and integration. Net leverage of 3.7x at close leaves limited headroom to the proposed leverage covenant if FY26 EBITDA falls short of forecast. Table 9 shows how quickly headroom is consumed in a downside.

9. Covenants and undertakings

9.1 Financial covenants

Covenant	Indicative level	Test
Net leverage (maximum)	4.50x, stepping down to 4.25x and 4.00x	Quarterly, rolling 12 months
Interest cover (minimum)	2.50x	Quarterly, rolling 12 months

Table 8: Indicative financial covenants (levels to be settled in the term sheet)

At the opening level of 4.50x, FY26 EBITDA could fall by 18.2% to approximately A$12.4M before a leverage breach, holding net debt at A$56.0M. At the interest cover minimum of 2.50x, EBITDA could fall by 21.7% to approximately A$11.9M. The leverage test is therefore the tighter constraint.

EBITDA vs forecast	EBITDA (A$M)	Net leverage	Interest cover
Forecast	15.2	3.7x	3.2x
Down 10%	13.7	4.1x	2.9x
Down 15%	12.9	4.3x	2.7x
Down 20%	12.2	4.6x	2.6x
Down 25%	11.4	4.9x	2.4x

Table 9: EBITDA sensitivity, net debt held at A$56.0M and cash interest at A$4.75M

9.2 Information and general undertakings

- Quarterly compliance certificates with covenant calculations, signed by the Chief Financial Officer.
- Monthly management accounts and annual audited financial statements, with the annual budget approved by the board.
- Restrictions on additional financial indebtedness, disposals, distributions and acquisitions without lender consent, with customary baskets.
- Maintenance of insurance and of all EPA and environmental licences, with prompt notice of any breach, incident or enforcement action.
- Hedging of a portion of the interest rate exposure, with the proportion and tenor to be agreed in the term sheet.

10. Process and timetable

Date	Milestone
11 August 2025	Information memorandum released to lenders
29 August 2025	FY25 financial statements (Brandt Kessler Chartered Accountants)
19 September 2025	Enterprise valuation and plant and fleet valuation reports
26 September 2025	Independent technical and capex report (Corrigan Mott Engineering)
14 November 2025	Updated management accounts
28 November 2025	Term sheet

Table 10: Indicative timetable (dates subject to change)

Lenders wishing to participate should confirm their interest to Pemberton Debt Advisory and execute the confidentiality undertaking, after which access to the data room, the financial model and management will be provided. Indicative credit feedback on the terms in Section 6 is requested ahead of the term sheet date. Pemberton Debt Advisory will coordinate questions and distribute responses to all participating lenders on an equal basis.

Pemberton Debt Advisory, 11 August 2025.
