From	Real Estate Origination (Brisbane)
To	Credit (screening)
Date	3 October 2026
Subject	Early approach: Harbour Point, A$65.0M land and civils facility

Tidewater approached us through a broker on 29 September. They want indicative appetite and terms within three weeks. This is an early approach: we have a desktop valuation only, no quantity surveyor's report has been commissioned and stages 3 and 4 are not yet approved.

Please screen it before we ask Tidewater to fund a full valuation and QS report. We would want to know whether the leverage, pre-sales and market are within appetite for a land and civils facility.

Points to cover

- Leverage: about 55% of indicative gross realisation and 72% of cost, on desktop numbers only.
- Pre-sales of 64 lots (30%) against a slowing market.
- Refinance of the existing A$22.0M land loan from a private lender.
- Competition from new releases in Caboolture West and Narangba.
