Reporting entity	Harveyville Healthcare Pty Ltd
ABN	92 207 130 560
Registered office	Level 8, 45 Phillip Street, Parramatta NSW 2150
Reporting period	Month of September 2026 and year to date (three months from 1 July 2026)
Financial year	FY27 (year ending 30 June 2027)
Prepared by	Harveyville Healthcare Finance team
Prepared for	Board of Directors; Ardent Health Partners Fund II
Status	Unaudited management accounts

Document details

1. Basis of preparation

This pack presents the unaudited management accounts of Harveyville Healthcare Pty Ltd and its subsidiaries (the group) for September 2026 and the year to date. Because FY27 began on 1 July 2026, the year-to-date period is the first quarter of the financial year and equals the three months ended 30 September 2026.

Figures are in A$ millions unless stated and are rounded to one decimal place, so totals may differ from the sum of components by 0.1. Variances are shown as favourable or (unfavourable) to EBITDA. Budget refers to the FY27 board-approved budget phased by month. FY26 comparatives are drawn from the financial statements audited by Lindqvist Marsh Chartered Accountants.

The group is subject to a conditional share sale agreement with Ardent Health Partners, executed in May 2026. The acquisition has not completed and no acquisition debt has been drawn. Nothing in this pack reflects acquisition accounting or the proposed facility, other than the pro forma information in section 8.

2. Executive summary

The group traded modestly ahead of budget in the first quarter. Year-to-date revenue was A$31.9M against a budget of A$31.4M, a favourable variance of A$0.5M or 1.6%. EBITDA was A$5.0M against a budget of A$4.9M, a favourable variance of A$0.1M or 2.0%. EBITDA margin was 15.7% against a budgeted 15.6%.

- Procedure volumes were 11,950 against a budget of 11,800, helped by stronger ophthalmology and gastroenterology lists at Wollongong and Newcastle.
- Theatre utilisation averaged 75% across the 24 operating theatres, against a budget of 74% and the FY26 full-year outcome of 74%.
- Employee costs were A$0.3M over budget, driven by agency nursing and anaesthetic support. This absorbed most of the revenue outperformance.
- Expansion capex was A$1.8M, A$0.3M behind the phased budget, because of a delay in the approvals for one site.
- September alone delivered revenue of A$10.8M and EBITDA of A$1.7M, each A$0.1M to A$0.2M ahead of budget.

3. Income statement, year to date

Insurer facility fees represented 73.0% of revenue, self-funded patients 21.6% and Department of Veterans' Affairs patients 5.3%. The mix is in line with budget. Visiting medical officers are independent accredited practitioners who pay no fixed fee, so revenue is driven by procedure volumes and the facility fee per case rather than by any practitioner charges.

A$M	Actual	Budget	Variance	Var %
Insurer facility fees	23.3	22.9	0.4	1.7%
Self-funded patients	6.9	6.8	0.1	1.5%
Department of Veterans' Affairs	1.7	1.7	0.0	0.0%
Total revenue	31.9	31.4	0.5	1.6%
Employee costs	13.4	13.1	(0.3)	(2.3%)
Medical consumables and prostheses	7.2	7.1	(0.1)	(1.4%)
Occupancy	1.9	1.9	0.0	0.0%
Other operating costs	4.4	4.4	0.0	0.0%
Total operating costs	26.9	26.5	(0.4)	(1.5%)
EBITDA	**5.0**	**4.9**	**0.1**	**2.0%**

Table 1: Income statement, three months to 30 September 2026

Revenue per procedure averaged approximately A$2,670 for the quarter, compared with A$2,607 for FY26 (A$122.0M over 46,800 procedures). The increase reflects case mix and the annual indexation of negotiated insurer agreements.

3.1 Monthly revenue profile

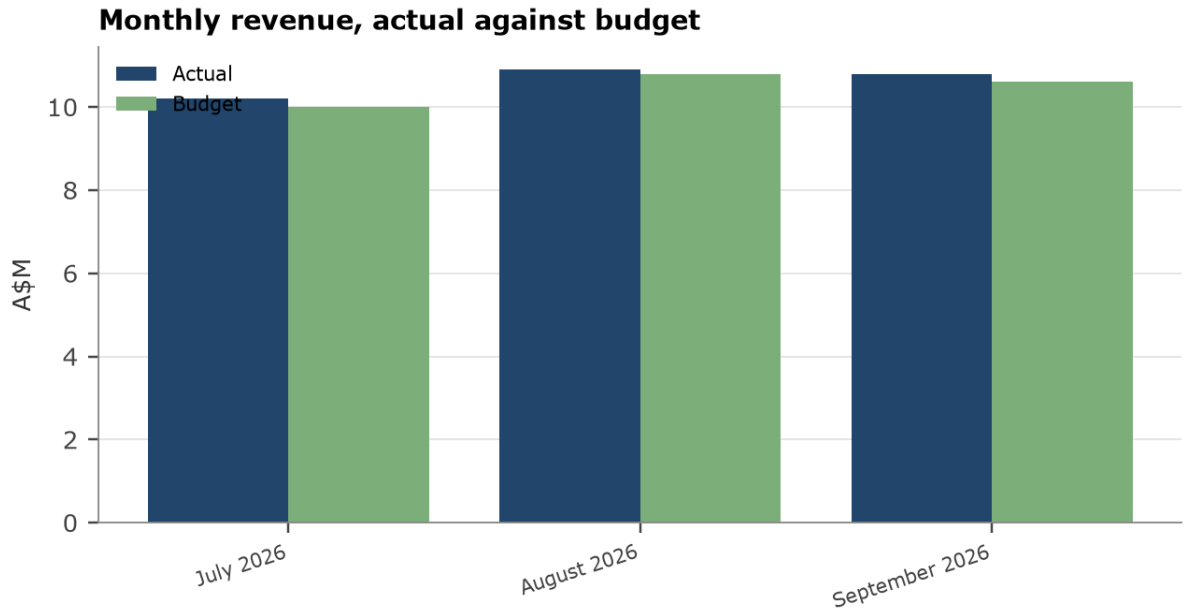

Figure 1: Monthly revenue, July to September 2026

Revenue was ahead of budget in each month. July was seasonally softer, reflecting fewer elective lists in the school holiday period. August and September were the two strongest months. September EBITDA of A$1.7M compared with a budget of A$1.6M.

4. Revenue by site

Wollongong, the purpose-built site opened in November 2022 with four operating theatres, delivered the largest favourable variance at A$0.2M as list utilisation continued to mature. Maitland, Gosford and Orange were on budget. No site was behind budget for the quarter.

Site	Actual	Budget	Variance
Parramatta	6.6	6.5	0.1
Penrith	4.0	3.9	0.1
Newcastle	5.2	5.1	0.1
Maitland	2.9	2.9	0.0
Wollongong	5.5	5.3	0.2
Gosford	4.3	4.3	0.0
Orange	3.4	3.4	0.0
Group	**31.9**	**31.4**	**0.5**

Table 2: Revenue by site, year to date (A$M)

5. Operating metrics

The group has 410 accredited doctors. The top 25 visiting medical officers continued to account for approximately 38% of procedure volumes, consistent with the FY26 position. No key surgeon has given notice of reduced sessions during the quarter.

Metric	Actual	Budget	FY26
Procedures, year to date	11,950	11,800	46,800 (full year)
Theatre utilisation	75%	74%	74%
EBITDA margin	15.7%	15.6%	16.0%
Employee costs to revenue	42.0%	41.7%	n/a
Average FTE	640	635	640

Table 3: Key operating metrics

6. Costs and workforce

Employee costs of A$13.4M were 42.0% of revenue against a budget of 41.7%. The overspend arose in nursing and anaesthetic support, where vacancies at Newcastle and Orange were covered by agency staff at higher hourly rates. Average FTE was 640 against a budget of 635. Management has opened recruitment for the vacant roles and expects agency use to fall in the second quarter, although this is not yet reflected in the forecast.

Medical consumables and prostheses were A$7.2M, or 22.6% of revenue, against a budgeted 22.6%. The A$0.1M overspend is volume related. Occupancy and other operating costs were on budget. Four of the seven sites are leased on terms of 8 to 15 years including options, and no rent reviews fell due in the quarter.

7. Capital expenditure and expansion programme

The theatre expansion programme has a total approved cost of A$11.4M. Spend this quarter was A$1.8M, A$0.3M behind the phased budget because of a delay in obtaining approvals at one site. The timing difference has not changed the total programme cost. The quantity surveyor's report from Pellegrino Doyle Quantity Surveyors Pty Ltd, dated 4 September 2026, has been received and management is reviewing its cost-to-complete assessment. Any change to the programme budget will be reported in the October pack.

A$M	Actual	Budget	Variance
Maintenance and replacement capex	0.9	0.9	0.0
Theatre expansion programme	1.8	2.1	0.3
Total capex	**2.7**	**3.0**	**0.3**

Table 4: Capital expenditure, year to date

The delay defers the incremental volumes assumed from the expansion theatres. Management estimates a deferral of roughly one month in the ramp-up, which is not material to the full-year forecast but is monitored.

8. Transaction information, pro forma

The following pro forma information is provided for the Board and the sponsor. It is based on FY26 results and has not been adjusted for FY27 trading. It assumes completion on the terms of the share sale agreement and the proposed senior secured term loan, which remains subject to credit approval and the term sheet expected on 12 October 2026.

The purchase price of A$136.5M compares with an independent valuation of A$140.0M from Carrick Whitlam Valuation Advisory Pty Ltd dated 28 August 2026. Pro forma net debt is A$70.2M. On FY26 EBITDA of A$19.5M this gives leverage of 3.6x and a net debt to enterprise value ratio of 51.4%. Pro forma interest cover is 2.9x. The three freehold sites are valued at A$38.5M in aggregate.

Sources	A$M	Uses	A$M
Senior secured term loan	72.0	Enterprise value (100% of group)	136.5
Sponsor equity	66.0	Transaction costs	1.5
Total sources	**138.0**	**Total uses**	**138.0**

Table 5: Pro forma sources and uses

On the first-quarter result, EBITDA is tracking at or marginally above the FY26 run rate, with no deterioration in the credit metrics above. These ratios have limited headroom, so the agency labour overspend noted in section 6 is the main trading item to monitor.

9. Risks and matters for the Board

- Labour cost: agency use is the main driver of the EBITDA margin sitting 0.3 percentage points below the FY26 level of 16.0%. A sustained overspend would erode headroom against pro forma leverage of 3.6x.
- Practitioner concentration: the top 25 visiting medical officers generate about 38% of volumes. Loss of a key surgeon would reduce theatre utilisation at the affected site.
- Funding and regulation: insurer agreements and Medicare Benefits Schedule changes continue to be monitored. No adverse change occurred during the quarter.

- Expansion execution: the approval delay shows the schedule risk in the A$11.4M programme. Cost and timing are reported against the quantity surveyor's assessment.
- Property: no lease expiries or rent reviews fell in the quarter. Freehold values remain sensitive to yield movements.

10. Outlook

Management expects October and November trading to remain close to budget, supported by a full elective list calendar and the normal seasonal increase in procedures before the summer period. The forecast will be updated in the October pack once the expansion approvals and agency staffing position are confirmed.
